

After 15 years of having a bull sale, we are selling females for the first time. Producers have asked us for years to do this, but up until now we simply did not have the numbers to do this. We were increasing our herd numbers to supply our growing demand for bulls and we had very few females available to sell. We have our herd numbers right where we want them and this year you have a chance to take home some excellent females. The females will sell similar to the bulls. Two exceptions are bids will be in \$50 increments, not \$100 and females may not be available for purchase after the sale.

Just like the bulls, we know all about these females. Please ask us for details before you purchase. Our goals if for each of these females to have a long, productive and profitable career in your herd.
